

Dear Sir,

4/19/10

I have read several articles which state J. P. Morgan has an unusually high short position in silver contracts. Therefore, they are able to manipulate the market. As an investor in silver and if this is true, I hope you will bring a large number of contracts to an end by one party.

An individual must depend on the integrity of your Commission to keep silver trading fair to all concerned.

Sincerely,
Mark F. Foster
