**Subject:** Regulation of Retail Forex

---

Dear CFTC,

While I think that the retail forex industry does need some more regulations to protect the consumer. Lowering the current margins from 100:1 to 10:1 is not only unwise but downright silly. Having the ability to use up to 100 times margin is something that makes forex exciting and very profitable for educated investors

Yes. Regulate away but don't mess with my margin.

Thanks for your time.

Matt Gagnon
