Subject: Regulation of Retail Forex

RIN 3038-AC61

Hello,

I am pleased with most of the regulations the CFTC intends to impose on forex brokers. As a trader it is my responsibility to asses and risk associated with trading. The 10:1 proposal is absolutely absurd. When I see ideas like this come up I ask myself "who stands to lose and who stands to gain?". Certianly not me or anyother trader. This 10:1 idea will force many of the us brokers and traders to move of shores and virtually kill the U.S forex market. hmmm..... foreign interests??????
