Subject: Proposed FOREX Leverage change

To Whom it may concern,

As a FOREX trader I am in strong disagreement with the proposed changes in Forex trading Leverage from 100-1 to 10-1.

This change Makes it **impractical** for small investors to participate in this market without having to Inflate a working capital

account **10** fold just to maintain status quo. I have made significant investment in time ,money and software in order to

participate in this market. This proposed change will make it impossible for me to continue trading as the potential return per

trade would be reduced to .10 per PIP!. The Risk /Reward in this market needs to be 100-1 just to make trading worth while

Thank you for hearing a lone Small,individual Forex investors plea.

Sincerely,

Lloyd Petersen
