Subject: Proposed forex regs

Hi there!

I am writing because of the new regulations which my broker has just informed me may go through, limiting leverage in the forex market to 10:1.

I am a private trader who trades full time, this is how I earn my living. I use leverage nowhere near 100:1 but also no where near 10:1. I understand all too well that if you dont understand/use leverage properly it can be dangerous, but I do not feel that I should be regulated to 10:1 leverage because others do not use it correctly and lose their monies.

If these regulations are passed, I would no longer be able to trade full time due to the restrictions this would place on my profit potential.

please do not regulate forex trades to 10:1.

Thank you!!
