**Subject:** Regulation of Retail Forex

---

My name is james larsen. I have just recently started trading in a forex account. I know you have 100's of thousands of these emails so ill keep it short. Im going to trade in forex, I would rather do it in a us account instead of over sea. Using a 10:1 leverage takes the small day trader out of the picture. So please don't change the leverage or I will be forced to go the another country.
