Please change position limits for trading the silver market, IT would be A refreshing change to see free market capitalism guide the silver market instead of insider manipulation.

The concentrated short position of J.P. Morgan is around 2500 contracts (1/4 of Annual world production) should the market set Silver's price or J.P. Morgan?
Gentlemen, you know the answer.

So please set Silver position limit at 1500 contracts, and watch free Enterprise take over the Silver market.
I pray that you will make the right choices.

grace + peace,
Robert Barnard
