Subject: Regulation on Forex - limitation on leverage

I believe the proposal to limit leverage will affect small trader like me as bigger fund is needed to manage risk. Therefore it will only benefit big players. Small trader should be given the freedom to decide on risk appetite. However I believe your proposal is well intentioned. So, I believe leverage should be more than 1:10 but Maximum 1:100. This will then make the market more interesting. Also, I think you should consider to review micro account as most micro account are not serious traders and too small players which they should have not involve in this high risk instrument.

Thank you
