---

It is crucial you do not change the 100 to 1 margin. I am a forex trader as a trader I don't think you realize how important the current margin is, to make a profit. I can stop any losses by putting in a stop order so this is no point whatsoever to changing the current margin. Please maybe your mind is already made up and I am wasting my time with this email but it is essential to leave where the rates are please don't ruin my life thanks.
