

Dear Committee Members,

I'm old enough to know the old adage "the rich get richer and the poor get poorer". That is one of the reason our country is on the verge of going under, that and our money going overseas to help the peasants (which usually just goes to the leaders) and there are families and the elderly who are going without!!!

Everyone is hurting with the oil prices!!! I have to choose to use my gas to either go to the doctor (which usually includes a prescription) or go to church. You know that little thing called Christianity which our country was founded on! I've known about speculators in the market for a long time, but it's time they were reined in! They probably still have half a million or so to spend after bills. I'm lucky if I can afford to eat out at McDonalds!

Why does Wall Street get to set the limits? Isn't that like the fox watching the hen house?

I guess I've said enough. Either do something with the futures commodities trading or be ready to go down with the rest of the country.
