Dear CTFC Members:

Haven't we learned anything from the recent financial crisis and Great recession? Why are you still allowing speculators to drive up the prices of oil, food, and heating energy among others? Our economy has been decimated for most Americans and some can't afford the very items YOU allow speculators to realize huge profits on while Americans are starving or freezing. YOU have been and will be again be responsible for the deaths of many Americans because you refuse to do your job. How can you sleep at night? The government of which you are a part of is destroying this country. Hopefully I'll be alive for the next great revolution which Thomas Jefferson said is necessary every generation for this great experiment to work. Please do your job or resign!!!!
