Subject: 'Regulation of Retail Forex'

RIN 3038-AC61

Hi,

I can see the move to tighten the leverage is going to kill a lot of FX traders. Personally I do not see the benefits to traders whatever clamdown it has on the regulations.

If the move is to reduce the leverage to 10:1, I am strongly against it.

If the regulation is to kill us, we will withdraw our funds and move our funds to stocks and elsewhere in the market.

Thank you.

Best Regards
