CFTC.

As millions of Americans take to the streets nationwide in protest, I am asking the CFTC to aggressively reign in excess speculation that's driving gas prices and food prices up . I am asking the CFTC to help stop the manipulation of commodities prices. I expect the Commissioners to be part of the solution and not the problem. The CFTC should not be listening to speculators and Wall Street lobbyists and their special interests but the American consumer. Its time to stop the interference of food and energy prices. Please impose meaningful position limits. I hope and pray the CFTC along with the FBI investigate and prosecute any and all Federal RICO violations that may surface during this investigation. The CFTC is the frontline of protection against corruption and unfair practices against the American Consumer. My prayer is that the CFTC will get tough and enforce the laws and rules evenly and fairly. Please stop the lobbyists and speculators from destroying the economy and way of life for millions of Americans and reform the system in place now. I am asking each one of you to act without delay in this matter.

Thank You,
Robert Gyr
