**Subject:** Forex Proposed Leverage change RIN 3038-ac61

---

I implore you to not change the leveraging maximum because it would leave out the small investor who contributes a level of purification to the market. The large institutional investors are substantially software driven in the investment of large blocks of currency and automatic stops and profit taking will make the foreign exchange market more controlled by computers without the human emotion and judgement that make a more perfect market and contributes to the stabilizing of the relative currency pairs.

Thank you for considering my opinion Tim Runion
