Subject: Regulation of Retail Forex

I understand you have a proposal to reduce the max allowable leverage for US based forex brokers to 10:1.

Please do this only if you intend to shut down all forex trading in the United States, and redirect all forex trading business to European and other foreign destinations. Of course then you have no more jurisdiction to make further changes in the name of security, safety or whatever.

My current broker is MB Trading, a US broker, and I don't want that to change, so please don't force me to do so. I certainly will if this regulation goes into effect.

Thank you,

Carol
