**Subject:** Regulation of Retail Forex

---

Dear Sirs,

NO to leverage reduction! To reduce the leverage would seriously inhibit my ability to supplement my Social Security income that I need to survive. There are thousands of us smaller account sized Traders around the USA. If we all are forced to stop trading would it not lead to layoffs at the Brokerage firms we use to trade? I am a Trader that is responsible for my trading actions. For those irresponsible and uneducated in Forex that subject themselves to significant losses through leverage, the same result would occur albeit would take longer with lower leverage.

Respectfully submitted,  
Mary K Wilson
