Subject: Regulation of Retail Forex'

i would like to add that i have spent the last 7 months learning and studying how to do trades, and i would be very grateful not to be shut out of the market.

RIN 3038-AC61

i am not happy about the proposed changes in leverage, because it would shut small people like myself out of the market. forex.com in particular, makes it abundantly clear that forex trading carries risk, and is not suitable for everyone. in addition, they do not allow traders to lose more than their optional investment. please do not enact changes that will keep people like myself out of the market.

sincerely,
basia wolff
