Subject: Forex Leverage

Dear Sirs:

I trade Forex mini lots at 10:1 leverage and can't wait till I have my account built up enough to to to 100:1 ratio. There is no reason for any changes to be made to the current Forex system. You can never control an individuals risk management, don't try be making it too expensive for the individual investor to trade Forex.

Please leave the Forex market alone.

Thank you,

John Stanley
