Subject: Regulation of retail forex

Gentlemen,

In re RIN 3038-AC61.

I strongly oppose your proposed reduction in currency trading margins. These are obviously designed to drive small speculators like myself out of the market. To what end? So you can further manipulate the dollar with less interference. This entire action is a huge overstep by big government, represented by YOU! Up yours!! I'll move my account offshore, like thousands of other traders. The net result will be hundreds of lost jobs in the U.S. forex industry. Why to go!!
