**Subject:** Regulation of Retail Forex

---

Dear CFTC!

Don t change the leverage under 1:100.

I m from Europe, and use a USA based company to trade. Thanks to the high leverage, I don t need to send all my money there to take trades or hedge.

If You do this, I will move my money out from Your country, and will search for other one.

The USA (and other countries) should regulate the house lending and company lending more regoriously, and not punish the retail FX traders and US Market Makers for the cheatings of Bank leaders.

Thanks,

Laszlo Nagy
