**Subject:** Disagree of proposal of new leverage 10:1 on forex trading

---

Hi,

I am a retail forex trader, recently CFTC proposed for new leverage of forex trading to 10:1.

I strongly disagree of this decision. If this is happen , i not going to trade with CFTC regulated forex film . The reason is such leverage was almost impossible to continues to trade for small capital investor like us.

I hope CFTC will re-consider this decision, although trade with non-CFTC regulated film will have higher risk, but we have to cause leverage 10:1 making us impossible to continues to trade with CFTC regulated film..

Please take serious consideration.

Best Regard,  
Daniel Yong
