Subject: Regulation of Retail Forex

Dear Sir/Ma,

With reference to the subject above, am writing to make known my reservation.
I do not support the proposed regulation to set a maximum leverage for US retail forex to 10:1
Quoting a member of forex peace army, "I I love risk management. I can take or make the worst trading decisions in the world and only lose money at an incredibly slow pace. Risk management is a good thing, but this is ridiculous." I can't agree less with this point of view. Moreso, this amount to denying me right to make my own informed trading decision.

Summarily, I am unequivocally stating and registering my rejection of this proposed regulation.

Yours Sincerely,
Morgan Emmanuel.
