Subject: Regulation of Retail Forex

To Whom it May Concern,

This correspondence is in response to the recent proposed changes to the Forex market. I must object to further regulations in regards to this market, I have been trading in the Forex for over 4 years now and to have the government, my government, decide what is best for me is not something that I need nor do I want. I think it is in the best interest of all parties to leave this market alone. If individuals wish to trade in the Forex market without the proper training and practiced techniques then they are the fools. I belong to the Forex Peace Army and they have been a watchdog for us for a very long time, they remain objective and fair in all of their dealings. If I need to know about what is going on in the market I turn to them and they respond. They have exposed many brokers as frauds and have given us vital information regarding everything that is need in this market. They are OUR police and they do a fantastic job of keeping us abreast of everything. I ask that you and your policy makers take an objective look at this situation and realize that it is not the banks nor the large investors that are going to be hurt by this policy, it is going to be the little guy who is handcuffed once again. My thanks for reading this message and my prayers that you see what is reality.

Regards
