

## City of Edmonton basement development

The **City of Edmonton** is responsible for the development of its own **basements**. It does not have any influence on the development of private or commercial **basements**, except in restricted instances where public safety issues are involved.

There are a lot of buildings in **the city of Edmonton**, which is located in Alberta, Canada. The city has more than 100,000 structures and many of these were built as early as 1892. In fact, the first building was erected outside the fort on what is now 99 Street and 107 Avenue. Today, there are still some structures from this era in the city. Edmonton is located on the North Saskatchewan River, at an elevation of 644 m (2108 ft). This city has 878,890 residents as recorded by the 2016 census, making it Alberta's second-largest city and Canada's fifth-largest municipality. Recently, the City of Edmonton has announced that it will be continuing its **basement development** program.

**The City of Edmonton** has been working on a project to develop the **basement** in the downtown core. There are plans to develop 140,000 square meters of new space and office capacity will increase by 80%. It is estimated that 1,100 jobs will be created and \$1 billion dollars invested into the city. **The City of Edmonton** is working on a new development project which will ensure your **basement** will be safe and dry. This new city program will help homeowners to know the benefits of **basement finishing**.
