The idea to change leverage in the currency market down to 10:1 after the dramatic change from 200:1 to 100:1 will only hurt the industry and its clients, along with thousands of direct jobs from traders to research analysts to brokers. The complaints you may have been receiving are solely those who failed to make it as a trader (its not easy), and they blame it on the leverage rather than themselves. With automatic margin calls, leverage is a safe way to allow smaller capitalized retail traders to make a decent return on the shift of currencies. I personally make my living trading the market using 100:1 leverage and conservative strategies, please do not let this pass. many jobs will be lost.
