Subject: Regulation of Retail Forex

Another example of how this government has only one thought. and that is that people are too stupid to make their own choices, so the government who knows better will make it for them. I cant believe your actually considering **forcing** a leverage of 10 to 1.

I get so amazed at how people want a government to control them and take care of them

get ready as this is the start... my account is in London and away from this government
