

TIPS FOR HOME DESIGN

Want to design your dream home?

With a lot to think about when designing a new home, it is no astonishing, self builders will get overwhelmed. It is simple to avoid key elements that could generate a great impact on the final property.

Below I highlight the tips provided by Asian School of Architecture and Design Innovations(ASADI) when designing your home.

1. Budget beyond the construction work

- ❑ Landscaping
- ❑ finance and insurance costs
- ❑ site surveys
- ❑ access from the highway

2. Reduce noise

- ❑ Unwanted noise is a common issue.
- ❑ Should be well-sealed and solid

3. Storage solutions

- ❑ Built-in storage
- ❑ Avoid free-standing chests of drawers and wardrobes

4. Home maintenance

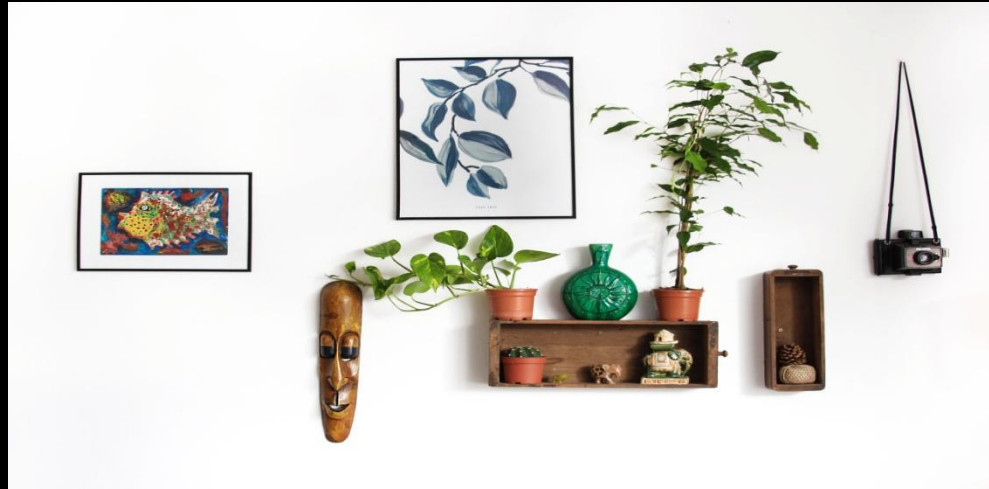

- ❑ redecorate regularly on plastic fascias and barge boards.
- ❑ Use rake and ladder

7. Windows and heat transfer

- natural illumination,
- sliding doors
- double-height windows
