

Please accept our official comment on KalshiEX Congressional Control Contracts co-signed by 10,942 people nationwide. Electronic signatures included below.

Dear Commissioners,

I strongly oppose KalshiEX's plan to enable gambling on the outcome of elections. This proposal would undermine our democracy and threaten the fabric of our entire political system.

Any investor who bets on a particular party to win an election would have every incentive to use any tool at their disposal to ensure that outcome. This proposal would give every investor on Wall Street a reason to become an insurrectionist. They could flood social media platforms with disinformation if they think it would help them. They could coerce their employees to vote for their preferred candidate. This proposal stands firmly in opposition to the public interest, because it invites malicious interference into our electoral process by Wall Street investors.

We must be realistic about who will use and abuse the ability to bet on elections. More than half households in the US cannot afford a \$1000 emergency expense, so this proposal, which sets a minimum investment of \$1000, invites electoral intervention from only the wealthiest people in the world. Our electoral system is already threatened by malicious intervention from various sources; it is unconscionable to invite even more

We saw in the aftermath of the 2020 election just how vulnerable our political system is to manipulation and abuse. KalshiEX's plan invites manipulation and abuse into our political system. At a moment when confidence in US institutions is at historic lows, this proposal would be catastrophic. I urge you to say no to any and all plans to allow gambling on the outcome of elections.

Sincerely,
