Subject: Regulation of Retail Forex"

Greetings;

I would like to express that I am against the proposal of raising the amount of capital I would have to have in reserve by 10 times, to participate in the FOEX markets.

I am a small trader with a micro account and there are times I trade 10K lots. I can not come up with the additional amount of free cash and would have to move my account overseas or quit altogether.

I don't plan on quitting so, I guess you can see what my next move would be so, I can continue to participate.

Why can't the government STAY OUT OF MY LIFE?
