Subject: Regulation of Retail Forex

To Whom it may concern,

I am writing to voice my concern of your constant changing of rules. I am assuming that it is not your intention to destroy our economy and our pursuit of liberty & happiness that the constitution granted us. If you continue to try and pass rules and laws like the 10:1 margin you will be destroying our government and the rights of the public to pursue happiness and freedom from tyrants. Please do not even consider passing such a rule. Most traders have already taken their accounts overseas because of the No-Hedging rule. This would finish off the rest of us...

Why would you want to destroy our economy and our government??

Sincerely,

David Weatherred
