Subject: Regulation of Retail Forex

Hello,

I am an independent Forex Trader and I strongly believe that limiting leverage to 10:1 is highly restrictive and discriminatory against traders like myself because it greatly limits my trading choices. During these incredibly tough economic times I have lost my business and turned to the Forex market as the only source of income for me, my wife and my family of 6 children. If you limit our leverage to 10:1 from the current levels of 100:1 my trading days are over and therefore my sole source of income is wiped out - please don't take away our livelihood with these changes. I have worked very hard at this to be able to provide for my family, and contribute to the recovery of the economy, and for you to change the regulations would end that for me, and for thousands of other traders as well.

If there are problems with some traders, then deal with those issues in a proper and fair manner, not by closing the trading door to everyone!

Regards,

.....
