Subject: Regulation of Retail Forex

All the regulation of the 10:1 is going to do is push all the us clients to foreign brokers, pretty stupid to me. You guys almost remind me of some of the tricks Obama is pulling, which is not very smart. Sending jobs overseas is not very smart, think about it. It is the same difference. The tax base has left this country, that is what caused so much inflation. you send all the forex traders to overseas brokers you will create a nightmare for us brokers. Wise up for once and do something that will help everybody, keep your nose out of wher it should not be. Travis Price
Forex trader.
