Subject: Regulation of Retail Forex

Capping Leverage at 10:1 is contradiction to the free market and capitalism. It is a violation of our rights and freedom to choose an avenue to invest. It is essentially an act of communism for the government to tell the investor what it can and cannot do. This act does not decrease the risk of the investor but gets rid of any investors with small capital so that the rich stay rich and the poor stay poor. I strongly condemn this proposal against the freedom of americans.
