Subject: regulations January 13, 2010

Hello.

I suppose that this regulation can be as DISCRIMINATION of poor peoples, who not so rich and can not put big amount of money for trading. Rich people as play game now and will play after this regulation, but only have less profit, but enough good for good live. People who do not have lots of money will be cat off from game. Why?. Only for reason that they is not so rich? I'm not agree with this.

It is not a perfect, but better to do regulation depending on amount on Trade. Some thing as we have now for different Trade Station system. As exemple; some Trade system have a minimum account \$500, but on other Trade system minimum is \$10,000, and so one. Better to do same for maximum amount on different Trade system. As example; minimum \$500 and maximum \$500,000 have a leverage 100:1, if your account is more then \$500,000 you mast go to next level same Trade system with leverage 10:1. or 1:1. I suppose this also will move rich people to look more place at US economic to input his money, then use them in trading system.

Thank you for your time and cooperation.

Alex Kh.
