Subject: Regulation of Retail Forex

Hi,

I am looking for details on this RIN 3038-AC61 regulation.

As a retail trader who didn't have anything to do with the market meltdown and never received a bailout, I'm shocked as to why we would be regulated- not the ones that caused the problem in the first place.

This seems like nothing more than an institutional lobby trying to rob retail competition by using the government that is supposed to protect us and our liberties to steal from us both in taxes and regulation- however I would like to see the proposal before making a comment.

Thanks,

Dan Hess
