Subject: Leverage Limit

Dear Sir:

Please know that I am against lowering the Leverage limit on Forex trades to 10:1. Traders should be responsible for policing themselves.

I do believe that Forex Brokers should be required to segregate funds and carry insurance, the same as with the Futures market, and the same as the U.K. and Canada.

If you limit the Forex trades to a leverage of 10:1, traders will not be trading in the U.S.A. when they can get higher leverage limits in Canada and the U.K. This will be unfortunate for the very traders that you are trying to protect.

Sincerely,

Gwendolyn D. Anderson
