Dear Sir,

as a live trader with some experience in the Forex Market, I concur that regulations for certain brokerage practices are in order, however, I have to register my strong disagreement with the leverage limit percentage of 10:1 maximum leverage.

Is it your intention to drive all the money and traders out of this country? I am an American and I do not condone this. This would drive more financial prospects from our country. It is right and proper to limit those 400:1 and such leverages but in my opinion 50:1 is fair to all. Please leave it alone.

Joanne Roddy.
