**Subject:** Regulation of Retail Forex

---

David Stawick, Secretary Commodity

I am writing as a US Citizen that has become outraged at the inappropriate actions of the NFA/CFTC and other entities that continue to erroneously place unreasonable regulations on the FOREX industry, the companies and the traders. Changes in Hedging, Leverage and other bogus regulations are detrimental to the business being done in the USA. This will simply force the markets outside of the USA; Business will not cease it will go off-shore as this is a global market that we deal it.

The issue that I am specifically writing about is RIN 3038-AC61. Do NOT reduce the leverage from 100:1 down to 10:1!!!!!!

If this passes, I will certainly put efforts into removing from office through the election process or having you removed from you post. Remember you for us the citizens, we do not work for the government.

Sincerely,  
Brian Morgan  
Orem, UT
