**Subject:** Regulation of Retail Forex

---

Dear secretary,

Do **not** reduce leverage to 10-1. The implementation of this proposal will **not** have the desired effect and thereby the CFTC will fail in their basic mission. 99% of retail Forex traders are aware of the risks associated with trading Forex because of advise from their broker. There is no need for this proposal as traders will simply look elsewhere for the desired leverage.

I sincerely hope you see the futility in this exercise and drop the proposal.

Regards,  
Concerned retail trader.
