**Subject:** Regulation of Retail Forex

---

David Stawick, Secretary Commodity, FTC  
Dear Mr Stawick:

This is in response to the new proposed ruling of January 13th regarding the proposed CFTC Leverage Changes, ID #RAC61, Interbank FX.

It is my belief that we do need regulatory agencies like NFA and CFTC to provide oversight and prevent fraud but NOT to micro-manage traders and the retail business of trading. Traders do not need any government regulations preventing them from trading. Capitalism and the free market WILL work if government will get out of the way and allow it. PLEASE allow it and keep America's liberties in tact. Thank you.

Marilyn Barnes, 4x Trader
