Subject: Regulation of Reatail FOREX

In reference to RIN - 3038AC61, I do not believe that limiting leverage to 100 to 1 will achieve the desired results. I believe that Retail traders will just close their American accounts and open accounts in other countries. As a retail trader I believe that the warnings, by the CFTC, to all traders in the FOREX are sufficient and are doing a good job in deterring speculation with money that traders cannot afford to lose.

Best Regards,
