Subject: Leverage

Please leave the Forex market alone in the U.S. Quit driving traders overseas. Bring back the ability to hedge here in the and stopping making it hard for trades to earn a living here. Yes it takes time to learn the Forex market and you will lose money until you learn from a professional trader how to trade. Leverage is your friend if managed correctly. If you go to 10:1 dollars will fly out of the U.S. even from the large firms like Goldman Sachs. The dollar will collapse.

Thank you,

Kevin
