Subject: Regulation of Retail Forwx

I am writing to voice my opinion on the considered change in leveraging of retail forex accounts. I am strongly against reducing the 100 to 1 leveraging down to 10 to 1 after already decreasing leveraging from 400 to 1 to 100 to 1. I understand your desire to protect the individual investor, however I feel we individual investors are protected enough and this proposed change infringes on our ability to make fair and reasonable return on investment as a small player in this market.

Sincerely,

Brian Marmen
