Subject: Do NOT change Leverage Please

David Stawick,

I ask that you please not change the forex trading leverage to 10 to 1 ratio because small entrepreneurs like my wife and I and as many others would not be able to afford trading, and we depend on the income for survival. I am sixty years old and I depend on this income to earn a living. The 400 to 1 ratio change to 100 to 1 leverage affected us enough already. Please do not change it to require \$10,000 for 1 lot that would not be productive or feasible for us. My son also depends on forex trading for a living and he has 4 small children and a wife to support. He is a Texas Christian University college graduate but he chose this profession. Please do not affect us with this change.

Regards,
Alejandro and Maria Laura Del Toro
Grand Prairie, Texas
