Subject: Regulation of Retail Forex

ALL WE NEED IS MORE REGULATION.....

If these dam financial advisors had gotten up from behind there desk and took care of there clients and followed basic trading rules (regardless of market there in) there clients would not of loss 60++++%% of there portfolio, we would not have the Feds screwing with free enterprise.

Politicians don't know how to run a business most have tried and failed.

Vince Sarneely of CNBC said 2 years ago, "the more these folks in Washington mess with free enterprise it would get much worse before it gets better".
