Subject: Regulation

Yes, you go ahead with your proposals. And keep propping up the banking industries that couldn't care less about us small folk, who are continuously paying the taxes to fund your idiotic suggestions. How the Hell are us little guys supposed to get ahead? All I see you proposing is a massive effort to keep the average person from bettering themselves. I look forward to the day that supposed Democratic & Republican Political Ideals are replaced by true fiscal practice to keep this country Great and our citizens prospering.
