Subject: Regulation of retail forex

Hello,

As a very small-stakes forex investor, I have found the high leverage to make investing on a small scale worth the time and effort. Without high leverage, it really won't be worth doing for me, and I'll have to stop. So I hope that you will leave leverage decisions in the hands of individual investor who are carrying the risk and should have the right to invest or not at their own discretion.

Thank you,
Mason Chapple
