Subject: regulation retail forex RIN3038-AC61

good evening, i write to yourselves because i am not in agreement with this new regulation, because it is a rule anti free market as long as the minimum opening amounts and optimum level of leverage continues the us brokers will be competitive, remember with the fifo rule many traders moved their accounts to australia and europe moreover, in the emerging markets people have been penetrating in the capital markets, because in these countries like mine, you must be rich to participate in the stock market, and a person can do short selling, and the transaction costs are expensive, so in some countries people are starting to watch forex as a new source of earnings, and an accessible source of investment, and so many as a new way of work, and people are starting to understand to not invest with scary money, so like an economist says this new rule will not be efficient in terms of supply and demand laws i mean there will be a movement in the equilibrium point

for paying attention thank you very much
