Subject: 10:1 CFTC regulation

My 2cents:

With the 10:1 rule the US will eliminate small forex businesses, eliminate forex traders with easy margin calls by the giant forex brokerage firms, create more rising forex unemployment people and traders/investors with the 10:1 idea because who would have \$10,000-\$20,000 enough to place only 1 standard forex position, especially in this 8+% unemployment economy, housing foreclosures market?? Plus, this is a very unfair advantage to all US forex currency investors 10:1 trying to compete with all the Non-US traders and Non-US forex brokerage firms who get 100:1, 200:1, 400:1 or better.

Thank you for listening and giving us a choice in this beautiful freedom USA.
