Subject: RE: Regulation of Retail Forex. . .

Forex Leverage Restriction Proposal: RIN 3038-AC61

Please know that I STRONGLY oppose any proposed ruling that would dramatically restrict leverage (10:1).

I do not oppose regulation or regulatory agencies. However, all such regulation needs to be fair and take the consideration of ALL investors into account. It is true that high leverage can get some traders into trouble if used thoughtlessly, But education is the solution, not restricting what experienced traders can and cannot do with their investment dollars. seek to guide, not dominate. All government should exist to protect people and their property, not to limit any individual potential.

Thank you for considering my view,
Lawrence Korbus
